

## MEMBERS LIST ( Updated June 2009)

As of 20th June 2009, the total number of names on our member's list is **243** - assume 20 for duplication means we have about **223 people in touch**. 121 of these are from the 1960s—more than half. I have contact details for everyone though some are on the various ex services web sites and other are via other members.

If your name doesn't appear on this list, it is probably my oversight as I have been transferring them from several different places and although I have cross checked them, I am only human and I do make mistakes. However you have not been left off deliberately. Do let me know if your details are not correct and I will endeavor to change them. (Contact details in newsletter)

Female names have, for the most part, been left in maiden name mode but Val Yates appears in the 1960s under her maiden name and with her married name in 1970 because that's how her colleagues would know her. Also some of the ladies from the very early years wrote to me with their details and it is quite possible that I have got their surnames the wrong way round. I live in hope that people will think I am too old and too dumb to do this job and replace me. Please form an orderly queue!!

I apologize to the people in the Miscellaneous group for not placing you in the right era, no doubt you have at some time given me the information but at the time of going to press, I could not find it. Also some people will appear twice because they span more than one era or I have simply made a mistake. The most important thing of course is that you are on the list. So if you are looking for colleagues check more than one section.

I thought now was the right time to let everyone know how much we have grown since Ron Freer first put his advert on channel 4 teletext back around 1998. It is particularly good to see the 1950s group growing and coming to the reunions too.
